“CAVANAGH SERVICES GROUP DOUBLES OPERATIONS IN 2nd YEAR”

Upon completion of its second year of operation, Cavanagh Services Group, LLC (“Cavanagh”) realized tremendous growth in all areas of its business. The packaging and transportation company increased personnel, equipment, and services offered across the board.

INCREASED SERVICES - In 2004, Cavanagh doubled its overall staff to enhance customer service support, expanded its operations into Oak Ridge, Tennessee by opening a new office and transload facility, and increased its fleet of transportation equipment by 60%. Additional capabilities such as disposal were also added to Cavanagh’s repertoire of services.

TURNKEY OPTIONS - With its growth and expansion, Cavanagh is positioned to offer more turnkey options to their customers that would contribute substantial efficiencies and cost savings to their project budgets and schedules. By contracting with Cavanagh to provide the entire scope of packaging, transportation, and related disposal activities, companies can, in turn, focus on their specific project needs.

HUBZONE, WOMAN-OWNED SMALL BUSINESS - As a Woman-owned, HUBZone small business, Cavanagh is strategically placed in a position to receive special consideration for government procurements. Large companies would greatly benefit from working with Cavanagh to meet their required small business goals. Also, large businesses would gain a significant advantage by teaming with Cavanagh on procurements that are specifically set-aside for small business.
