“CSG OPENS SOUTHEAST REGIONAL OFFICE AND RAIL TRANSLOAD FACILITY AT ETTP TO SUPPORT 2008 CLOSURE”

Cavanagh Services Group, LLC (“CSG”) has opened its Southeast Regional Office and Rail Transload Facility onsite at the East Tennessee Technology Park (“ETTP”). CSG signed a lease with the Community Reuse Organization of East Tennessee (“CROET”) for its new regional office and rail transload facility in April. CSG is a HUBZone, Woman-Owned waste packaging, transportation, and logistics small business that provides these services to various Department of Energy (“DOE”) contractors.

“With the emphasis on cleaning up and moving waste offsite for final disposition, we are here at ETTP to work face-to-face with our customers to get them the containers, trucks and/or rail transportation they need to meet their schedules,” says Sue Rice, president of CSG. “CSG’s onsite, everyday presence greatly benefits our customers as we can respond safely, quickly and give them the cost-efficiencies they need.” CSG’s office is located onsite at ETTP in building K-1035 while Avenue G will serve as its rail transload facility location.

The Avenue G Rail Transload Facility is a facility that offers tremendous options to DOE cleanup contractors onsite that have waste requiring disposal out of state. The 2008 Closure will require multiple pathways offsite for waste disposition. “By offering rail services here at ETTP, we will expand upon our local project experience to get the job done,” said Sammy Jones, CSG vice-president Eastern Operations.

CSG transports waste by rail throughout the United States under contract with the major railroad companies. The company also owns railroad-compatible containers, i.e., cargo containers, sealand containers, etc. and has a fleet of 177-ton, 8-position flatbed railcars to transport containers cost effectively.

CSG provides waste packaging, transportation, and logistical services to the radioactive waste remediation industry. Services include providing packaging materials such as Cargo/Sealand containers, IP-1 Intermodal containers, Rolloff containers, Type 7A B-12/B25 boxes, container liners, soft-sided containers (bags), truck and rail transportation services.

For more information regarding CSG and its services, please contact Sammy Jones at our Southeast Regional Office (865) 363-2058, sjones@cav-services.com or Sue Rice at our Corporate Office (801) 532-2272, srice@cav-services.com.
